

Credit Suisse Index Fund private investor share classes

As perfect as the original:
Credit Suisse Index Funds

This is a marketing communication.
Please refer to the prospectus/information document of the fund and to the
KIID/KID (as applicable) before making any final investment decisions.

As perfect as the original

What gives Morpho butterflies their exceptional blue hue is the unique surface structure of their wings. Whoever seeks to harness such amazing feats of nature must perfectly master the technique of replication. Bionics, as an interdisciplinary field of research, has set this very objective for itself. It transfers outstanding natural phenomena to technical applications that we humans can use in everyday life.

At Credit Suisse Asset Management, we share this enthusiasm for exact replication. By combining knowledge, experience, and technology, we make selected indices investable for our clients on a global scale. Our requirements for the greatest possible precision have made us one of Europe's leading providers of index funds that are as perfect as the original.

Institutional investors have sworn by index funds and exchange traded funds (ETFs) for years. This is due to their broad diversification, high level of cost efficiency, and the low risk of their performance deviating from the selected reference index. Index funds and ETFs can also serve as strategic cornerstones of a portfolio or for the implementation of tactical investing decisions.

What exactly sets Credit Suisse Index Funds apart?

Index funds and exchange traded funds (ETFs) pursue a so-called passive investment approach that sees the reference index underlying the respective fund replicated as precisely as possible. This means that the fund replicates the performance of the index.

The Credit Suisse Index Funds, CSIFs for short, have the following characteristics:

- They have a long-term track record, boast a high volume of fund assets, and demonstrate great precision in their index replication.
- They offer daily liquidity.
- They minimize the total cost of the investment, meaning the costs of buying, holding, and selling the fund for the selected time horizon.

Optimal fund structures

Under the designation Credit Suisse Index Funds CSIFs, Credit Suisse Asset Management manages around 100 index funds under Swiss or Luxembourg law. Since March 2020, some of these funds are structured as exchange traded funds (ETFs) under Irish law. As Irish ETFs, these funds benefit from a halved tax rate for US withholding tax. These CSIF ETFs can be continually traded on the Swiss, German, and Italian stock exchanges.

Clear and understandable investments for over 25 years

The Index Solutions unit of Credit Suisse Asset Management has specialized in indexed asset management since 1994. Our global competence center in Zurich works in a careful and precise manner to develop clear and understandable investment products.

Our specialist team of portfolio managers possesses long-standing experience in managing indexed portfolios. With clearly defined processes and an integrated system for portfolio management, trading, and risk monitoring, we provide the best possible service for our clients. The meticulous selection of our partners for index calculation, fund administration, securities safekeeping, and securities trading allow us to provide a high quality of our index products.

Dr. Valerio Schmitz-Esser
Managing Director,
Head of Index
Solutions

The importance of ESG

ESG stands for environmental (E), social (S), and governance (G). For further information about the ESG investment criteria and the sustainability-related aspects of our funds please consider the legal and regulatory documents for the funds, such as the prospectus and visit credit-suisse.com/esg. In addition to sustainability-related aspects, the decision to invest in the fund should take into account all objectives and characteristics of the fund as described in its prospectus, or the information which is to be disclosed to investors in accordance with applicable regulations.

Labels

ETF	Bid-ask spreads apply. Listed at SIX, Deutsche Börse, and Borsa Italiana.
FoF	Funds of funds are investment funds that invest the money of their shareholders in shares of other investment funds.
Art. 8	Financial products which promote environmental or social characteristics. ¹
Art. 9	Financial products which have sustainable investment as their objective. ¹

¹ As defined in the Regulation on Sustainability Disclosures in the Financial Services Sector (the Sustainable Finance Disclosure Regulation or SFDR).

Funds replicating sustainability indices. More information is available on page 3.

¹ Share class to be launched.

The LuxFLAG ESG Label is valid for the period ending on 31 December 2022. Please note that investors must not rely on the LuxFLAG Label with regard to investor protection issues and LuxFLAG cannot incur any liability related to financial performance or default of the fund.

The ongoing charges figure is based on last year's expenses. This figure may vary from year to year. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment undertaking. The spreads are credited to the fund and cover the transaction costs arising from subscriptions and redemptions (antidilution levy). The subfunds with the suffix "Blue" do not enter into securities lending. All CSIF (CH) in Switzerland are licensed for distribution in Switzerland.

The investment promoted in this marketing material concerns the acquisition of units or shares in a fund and not of any underlying assets. The underlying assets are owned by the fund only.

All CSIF (Lux) and CSIF (IE) are licensed for distribution in the following countries: AT/CH/DE/ES/FR/UK/IT/LU/NL/SE/SG/LI/IE. The suffix "TR" after an index name stands for "total return" (gross dividends reinvested); "NR" stands for "net return" (net dividends reinvested). F, A and B share classes can be subscribed by both qualified and private investors. Denominations containing the letter A indicate distributing share classes, the letter B indicates accumulating share classes. H indicates hedged share classes. Source: Credit Suisse, as of 31.07.2022.

Potential risks of investing into the Credit Suisse Index Funds

Equity risk: Equities are subject to market-, sector-, and company-specific risk which may result in price increases/decreases.

Fixed income risk: The interest rate on corporate bonds and most government bonds will not increase in line with inflation. Thus over time, the real value of investors' income is likely to fall.

High-yield bond risk: High-yield bonds carry a higher level of default risk and can be less liquid than government bonds and investment-grade corporate bonds.

Bond downgrade risk: There is also a risk that a corporate bond may be downgraded, which may be an indication of the possibility of default. If a ratings agency downgrades a corporate bond's rating, it may be harder for the corporation to pay. This will typically cause the value to decrease and may result in price decreases.

Mutual funds risk: Mutual funds are subject to market-, liquidity- underlying investment-, and cash-risk which may result in price increases/decreases.

Senior loans: Senior loans are debt instruments that provide the lender with a senior claim to the borrower's assets; they take priority over other unsecured loans or debt instruments. In case of bankruptcy of the borrower, senior loans will supersede the claims of other creditors.

Investments in illiquid assets: When investing in securities which are not traded on exchanges or on regulated markets, it may be difficult to readily sell such securities. Moreover, there may be contractual restrictions on the resale of such securities. In addition, when investing in futures contracts or options, such instruments may also be subject to illiquid situations when market activity decreases or when a daily fluctuation limit has been reached. Most futures exchanges restrict the fluctuations in futures contract prices during a single day by regulations referred to as "daily upper limits". When the price of a futures contract increases or falls to the maximum limit, the investor may be prevented from promptly liquidating unfavourable positions, which may result in losses.

Alternative funds risk: Alternative funds can invest in securities that have limited liquidity, including non-transferable assets. These might include, but are not limited to, senior loans, insurance bonds, derivatives contracts (both exchange-traded or over-the-counter), commodities. Some of these funds may have positions that include leverage.

Structured products risk: The investor bears the risk that the issuer of the investment product may become insolvent (issuer risk), which may lead to a partial or total loss of the invested capital in case of insolvency of the issuer. The structured product is linked to the creditworthiness of the reference entities. The likelihood of a credit event occurring in respect of the reference entities will generally fluctuate with, among other things, the financial condition and other characteristics of the relevant reference entities, general economic conditions, the condition of certain financial markets, political events, developments or trends in any particular industry and changes in prevailing interest rates. Prospective investors should conduct their own investigation and analysis with respect to the creditworthiness of the reference entities and the likelihood of the occurrence of a credit event with respect to the reference entities. The note may trade considerably below the redemption price during its lifespan even if no credit event has occurred on the reference entities. There may be no capital protection with a particular structured product.

Hedge funds risk: Hedge funds are not suitable for all investors as they can involve speculative strategies. Investments in hedge funds are not guaranteed and therefore the value of an investment can rise and fall. Hedge fund investments carry additional risks such as those associated with limited liquidity, the use of leverage, short sales, derivative instruments, futures, options, emerging markets, illiquid investments. Investment in hedge funds can result in an entire loss of the capital invested.

REITs risk: The risks associated with a REIT investment vary and depend on the unique characteristics and features of each REIT, as well as the geographical location of the investments. Do not simply look at the expected yield, but also consider the concentration, quality and lease length of the underlying properties. Some of the risks associated with investing in REITs include: market-, liquidity- and leveraging-risk, although this list is not exhaustive.

FX risk: FX trading is subject to currency- and leveraging-risk and could involve a significant risk of loss of capital.

Market risk: The price and value of investments and any income that might accrue could fall or rise or fluctuate. You may also lose the total sum that you have invested. If any of the markets on which any of the underlying investments in the fund is listed were to perform negatively, an underlying investment which has a high correlation to its market will generally move in tandem, irrespective of its fundamental strength. This in turn will affect the performance of the fund. Market risk is inherent in all funds which are populated with quoted investments.

Liquidity risk: This is the risk of not being able to sell your investment at short notice. Regulated mutual funds usually trade on a daily basis, thereby offering good liquidity. Should there be a high number of redemption requests at any time owing to a desire by large numbers of investors to liquidate their holdings, the fund may suspend liquidations or offer reduced liquidity in order to reduce the impact of having to sell significant amounts of the underlying investments in order to meet the requests.

Cash risk: Where a fund holds at any one time a substantial proportion of its assets in cash, near-cash, or money-market instruments, it might not participate fully in a rise in market values of the asset classes the fund would otherwise invest in.

Underlying investment risk: This is the risk of any of the underlying investments in a fund underperforming for any reason. By definition, such risk attaches to each of the underlying investments in all diversified funds. Underperformance by one or more of the underlying investments will negatively affect the overall performance of the fund, although the relative impact of each individual underperformance will be determined by the extent of the fund's diversification.

Leveraging risk: A fund may maintain net open positions in securities, currencies, or financial instruments with an aggregate value in excess of such fund's net asset value (leverage). Such leverage presents the potential for significant profits but also entails a high degree of risk including the risk that losses in excess of the amount invested will be sustained. Even where a fund will not be leveraged, certain transactions may give rise to a form of leverage if the fund may borrow funds and/or employ financial instruments and techniques with an embedded leverage effect. The consequence of the leverage effect is that the value of a fund's assets increases faster if capital gains arising from investments financed through leverage exceed the related costs, notably the interest on borrowed monies and premiums payable on derivative instruments. A fall in prices, however, causes a faster decrease in the value of the fund's assets. In extreme cases this may result in an individual fund becoming worthless. In any instance the liability of each shareholder is limited to the amount invested in the relevant share class.

Your Personal Data will be processed in accordance with the Credit Suisse privacy statement accessible at your domicile through the official Credit Suisse website <https://www.credit-suisse.com>. In order to provide you with marketing materials concerning our products and services, Credit Suisse Group AG and its subsidiaries may process your basic Personal Data (i.e. contact details such as name, e-mail address) until you notify us that you no longer wish to receive them. You can opt-out from receiving these materials at any time by informing your Relationship Manager.
