Chapter 5 “Investment in CS Investment Funds 1” and chapter 9 “Expenses and Taxes” of the Prospectus will be amended as well to reflect the foregoing.
2. Notice is hereby given to all Shareholders of the Company that the board of Directors of the Company (the “**Board of Directors**”) has decided to amend section ii, “Expenses”, of Chapter 9, “Expenses and Taxes”, of the Prospectus so as to disclose that any license fees payable to index providers will be borne by the Company.
3. Notice is hereby given to the Shareholders of the Company that the Board of Directors has decided to amend the investor profile of the following subfunds (for the purpose of this section, the “**Subfund**”) as follows:

Subfund	Old Investor Profile	New Investor Profile
Credit Suisse (Lux) AgaNola Global Convertible Bond	<i>The Subfund is suitable for investors looking for an uncomplicated way to participate in a professionally structured portfolio comprising conversion and option rights of issuers domiciled worldwide. It enables them to benefit from the potential for attractive price gains, an appropriate return and broad risk diversification, and to exploit the opportunities presented by an indirect equity investment involving limited risk, without them having to forgo a secure return.</i>	<i>The Subfund is suitable for investors with medium risk tolerance and a medium-term view who wish to invest in a broadly diversified portfolio of debt securities.</i>
Credit Suisse (Lux) AgaNola Global Value Bond Fund	<i>The Subfund is suitable for investors who would like an exposure to the fixed-income segment and want to link the development of this investment class to the economic cycle, while also wishing to participate in the added value arising from the use of various derivative investment strategies in the bond Markets.</i>	<i>The Subfund is suitable for investors with medium risk tolerance and a medium-term view who wish to invest in a broadly diversified portfolio of debt securities.</i>
Credit Suisse (Lux) Euro Corporate Bond Fund	<i>The Subfund is suitable for investors who are seeking the potential for a high level of current income and some capital appreciation over time and can accept the risks associated with investing in corporate bonds.</i>	<i>The Subfund is suitable for investors with low tolerance and a medium-term view who wish to invest in a broadly diversified portfolio of debt securities.</i>

Credit Suisse (Lux) Floating Rate Credit Fund	<i>The Subfund is suitable for investors who are seeking an investment which offers on the one side the same income as short-dated bond investments but without the exposure to interest-rate risks that is normally associated with such income and on the other side can accept the risks, including significant fluctuations in value, associated with investing in corporate bonds, asset backed and mortgage backed securities.</i>	<i>The Subfund is suitable for investors with medium risk tolerance and a short-term view who wish to invest in a broadly diversified portfolio of debt securities.</i>
Credit Suisse (Lux) Global Inflation Linked Bond Fund	<i>This Subfund is suitable for investors seeking a cost-effective core investment in bonds and wishing to protect themselves against inflation risk. It allows investors to entrust the time-consuming task of selecting and monitoring securities to a team of qualified experts. This Subfund is well suited to portfolio diversification.</i>	<i>The Subfund is suitable for investors with low risk tolerance and a medium-term view who wish to invest in a broadly diversified portfolio of debt securities.</i>
Credit Suisse (Lux) High Yield USD Bond Fund	<i>The Subfund is suitable for investors with a long-term, risk-tolerant outlook who would like to participate directly in a broadly diversified bond portfolio in order to benefit from the potential offered by the high-yield capital market, thereby achieving higher returns than would normally be generated by conventional bond investments. Though the risks are lessened by a broad investment spread across many issuers and several sectors, exposure to the high yield segment requires a greater degree of risk capacity.</i>	<i>The Subfund is suitable for investors with high risk tolerance and a medium-term view who wish to invest in a broadly diversified portfolio of debt securities within the high yield sector.</i>
Credit Suisse (Lux) US Corporate Bond Fund	<i>The Subfund is suitable for investors who are seeking the potential for a high level of current income and some capital appreciation over time and can accept the risks associated with investing in corporate bonds.</i>	<i>The Subfund is suitable for investors with low risk tolerance and a medium-term view who wish to invest in a broadly diversified portfolio of debt securities.</i>
