

# Dr. Gery Colombo

---

## About

Gery Colombo is a technology expert in the fields of robotics and medical technology. He is the founder of Hocoma AG, the global market leader in the development, manufacturing, and marketing of robotic and sensor-based devices for functional movement therapy.

---

## Career

Since selling the company, Gery Colombo has been active in the boards of several companies. He is a member of the Evaluation Board of Wyss Zurich, chairman of a technology startup, and serves as an advisor to other companies in his field of expertise. Previously, he was the CEO and a board member of Hocoma for 20 years. Prior to this, he was the head of research at Balgrist University Hospital in Zurich. Gery Colombo has received numerous awards throughout his career and co-authored several scientific articles. Hocoma has been recognized as one of the most influential companies in the global robotics industry.

---

## Education

Gery Colombo holds a PhD in technical sciences from the Institute for Biomedical Engineering and a master's degree in electrical engineering and information technology from ETH Zurich.
